Matthew S. Walters, Ph.D.
Associate Professor of Medicine
Department of Medicine
Section of Pulmonary, Critical Care and Sleep Medicine
University of Oklahoma Health Sciences Center

Contact Information:

E-mail: Matthew-S-Walters@ouhsc.edu
Phone: 405-271-3803
Office: 800 N. Research Parkway, Rm. 410, Oklahoma City, OK 73014

Education:

Ph.D. in Molecular Virology (2004), University of Leeds, Leeds, UK
BSc (1st Class Honors) in Genetics (2000), University of Liverpool, Liverpool, UK

Postgraduate Education and Training:

Postdoctoral Research Scientist (2004-2009), Department of Microbiology and Immunology, Columbia University, New York, NY, USA

Academic Appointments:

Adjunct Associate Professor (2022-present), Department of Cell Biology, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Adjunct Associate Professor (2022-present), Department of Microbiology and Immunology, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Associate Professor of Medicine (2022-present), Department of Internal Medicine, Section of Pulmonary, Critical Care & Sleep Medicine, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Adjunct Assistant Professor (2017-2022), Department of Cell Biology, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Adjunct Assistant Professor (2017-2022), Department of Microbiology and Immunology, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Assistant Professor of Medicine (2016-2022), Department of Internal Medicine, Section of Pulmonary, Critical Care & Sleep Medicine, University of Oklahoma Health Sciences Center, Oklahoma City, OK, USA

Assistant Research Professor (2010-2016), Department of Genetic Medicine, Weill Cornell Medical College, New York, NY, USA

Associate Research Scientist (2009-2010), Department of Microbiology and Immunology, Columbia University, New York, NY, USA

Research Interests:

The major focus of my research program is to understand the cellular processes that regulate airway epithelial stem/progenitor cell fate decisions during repair and regeneration of the lung. Alterations in the normal ratio of differentiated epithelial cell types (defined as epithelial remodeling) are associated with multiple chronic lung

diseases including asthma, cystic fibrosis (CF), idiopathic pulmonary fibrosis (IPF) and chronic obstructive pulmonary disease (COPD). The overarching goal of my research is to identify signaling pathways that regulate differentiation of airway epithelial stem/progenitor cells into specific cell types thus providing novel targets for developing new therapies to treat chronic lung disease.

In addition to studying the processes that regulate lung regeneration and repair, my lab is engaged in team-science based collaborations with Dr. James Papin (Associate Professor, Department of Pathology, Division of Comparative Medicine, OUHSC), Dr. Dean Myers (Professor and John W. Records Chair, Department of Obstetrics and Gynecology, OUHSC) and Dr. Anthony Burgett (Associate Professor, Department of Pharmaceutical Sciences, OUHSC) focused on studying host-virus interactions during respiratory virus infection (e.g., SARS-CoV-2) of the airway epithelium using both *in vitro* and *in vivo* models.

Publications:

A complete list of published work can be viewed in MyBibliography:
